THE

RUBBER RESEARCH INSTITUTE OF CEYLON

QUARTERLY JOURNAL

VOLUME 48

1971

RUBBER RESEARCH INSTITUTE OF CEYLON
Dartonfield, Agalawatta,
Ceylon.

CONTENTS

Vol. 48, PARTS 1 AND 2 (JULY/SEPTEMBER)

PAGE

Address of welcome —
by *the Chairman, Rubber Research Board* 1

Opening address to the Ceylon Rubber Conference —
by Hon. Dr. Colvin R. de Silva (*Minister of Plantation Industries*) ... 2

Scope of conference —
by O. S. Peries (*Director, Rubber Research Institute of Ceylon*) ... 5

Developments in *Hevea* planting material in Ceylon —
by L. B. Chandrasekera 7

A new basis for the selection of *Hevea* seedlings —
by D. M. Fernando and M. S. C. de Silva 19

Contribution of the IRCA to the improvement of propagation, by budding, of *Hevea* —
by C. J. du Plessix, P. Gener and J. Gl. Combe (*IRCA*) 31

New super high tapping technique —
by Tan Hong Tong and D. Selby (*Chemara Research Station, Malaysia*) 32

Studies on latex flow patterns and plugging indices of clones —
by U. P. de S. Waidyanatha and L. S. S. Pathiratne ... 47

The yields and secondary characters of clone RRIC 102 —
by D. M. Fernando 56

A study of growth parameters in a population of nursery rootstock seedlings of *Hevea brasiliensis*, cv. Tjir 1 —
by N. E. M. Jayasekera and Y. D. A. Senanayake 66

Sulphur in the control of White Root disease —
by Vimaladevi Satchuthananthavale and L. Halangoda ... 82

Black Root disease of *Hevea* caused by *Xylaria thwaitesii* —
by H. L. Munasinghe 92

Oidium leaf disease — the effect of environment and control measures on incidence of disease and atmospheric spore concentration —
by T. M. Fernando 100

Assessment of the incidence of *Oidium* leaf fall and economics of its control in the smallholdings —
by A. de S. Liyanage, O. S. Peries and R. D. Sebastian 112

Black Stripe or Bark Rot of *Hevea* —
by Vimaladevi Satchuthananthavale 125

Mould contamination of rubber —
by W. C. Dayaratne and H. L. Munasinghe 136

Vol. 48, Parts 3 and 4 (October/December)

PAGE

An evaluation of the nutrient status of the rubber soils of Ceylon —
by C. G. Silva 147

Use of appropriate fertiliser for rubber based on soil and leaf nutrient survey —
by M. M. Guha, M. M. Singh and H. Y. Chan (*Rubber Research Institute of Malaya*) 160

Weed control under *Hevea* in Ceylon with herbicide mixtures based on MSMA —
by N. Yogaratnam 168

Bacterial coagulation of latex —
by R. Satchuthananthavale and Vimaladevi Satchuthananthavale ... 182

Possibilities of bacterial coagulation in raw rubber manufacture —
by R. Satchuthananthavale, Vimaladevi Satchuthananthavale, M. Nadarajah and I. Amarasinghe 193

Some naturally occurring antioxidants in *Hevea brasiliensis* latex —
by M. Nadarajah, A. S. L. Tirimanne, A. Coomarasamy and S. Kasinathan 202

New presentation processes — An essential feature of modernisation of the natural rubber industry —
by B. C. Sekhar (*Director, Rubber Research Institute of Malaya*) ... 212

Experience of the French speaking Institutes in the field of processing and technical grading of natural rubber —
by Jean Leveque (*French Rubber Institute, Paris*) 239

NR latex applications and developments
by E. G. Cockbain (*Natural Rubber Producers' Research Association, U.K.* 244

Preparation of Heveacrumb from first fraction coagulum —
by S. W. Karunaratne 252

Suggested improvements in the manufacture of Ceylon natural rubber —
by M. T. Veerabangsa and M. Nadarajah 260

An analysis of the economic prospects of the rubber industry —
by A. B. Dissanayake 269

Summary and conclusions —
by O. S. Peries 284
...
